DETAILED ACTION

This Office Action is in response to the amendment filed 22 June 2005.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 16-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamazaki in view of Ogawa et al. (U.S. Patent 5,670,297).

Yamazaki et al. discloses an electro-optical device (Figs. 5 and 6) that contains a silicon semiconductor layer (503/504), a p type impurity region (514) provided in semiconductor layer, a first interlayer insulating film (516/622) comprising silicon nitride over the semiconductor layer, where the active matrix circuit is incorporated into a liquid crystal display, image sensor or liquid crystal electro-optical device, the interlayer insulating film can be a multilayer of silicon nitride and silicon oxide and a conductive layer (522-525) comprising multilayer of titanium and aluminum over the insulating film, where the conductive layer comprises an electrode and wiring and is formed over the first interlayer insulating film. Yamazaki discloses all the limitations except for a second interlayer insulating film formed over conductive layer to provide a leveled upper surface. Whereas Ogawa discloses a semiconductor layer (Fig. 8) that contains a

Art Unit: 2822

semiconductor layer (16), a first interlayer insulating film (22) with a conductive layer (24/26) formed over first interlayer insulating film, a second interlayer insulating film (28) formed over conductive film to provide a leveled upper surface over semiconductor layer. The second interlayer insulating film is formed with a leveled upper surface to allow for other layers to be formed thereon, such as another conductive layer or interlayer insulating film. Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Yamazaki by incorporating a second interlayer insulating film with a leveled upper surface to allow for the formation of other layers thereon, such as another conductive layer or interlayer insulating film as taught by Ogawa.

Response to Arguments

Applicant's arguments with respect to claims 16-32 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 10/713,275 Page 4

Art Unit: 2822

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiesha L. Rose whose telephone number is 571-272-1844. The examiner can normally be reached on M-F 8:30-6:00 off 2nd Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
